PROFESSIONAL SUMMARY

Results-driven Junior Full-Stack Developer with hands-on experience designing and developing scalable web applications and enterprise solutions using ASP.NET MVC, PHP, C#, SQL Server, Entity Framework, HTML, CSS, JavaScript, and Bootstrap. Strengthened backend development skills through a Java Developer Internship at ProgressSoft, gaining practical experience in enterprise software development, secure coding practices, and collaborative Agile environments.

Recognized for combining strong technical expertise with excellent problem-solving, analytical thinking, communication, teamwork, adaptability, and time management to deliver reliable, maintainable, and user-focused solutions. Passionate about continuous learning, writing clean and efficient code, and leveraging AI-powered technologies to build innovative, real-world applications that create measurable business value.

PROFESSIONAL EXPERIENCE

Fullstack Development Trainee 02/2026 – 06/2026

Orange Coding School

- *Successfully completed an intensive* 4-month Full-Stack Web Development Bootcampfocused on designing and building production-ready web applications using *ASP.NET Core MVC, C#, HTML5, CSS3, JavaScript, Bootstrap, SQL Server, and Entity Framework*.
- *Developed multiple end-to-end web applications by applying* Object-Oriented Programming (OOP), SOLID principles, Clean Architecture, RESTful APIs, and database designfollowing industry best practices.
- *Worked in an* Agile development environment, participating in sprint planning, code reviews, debugging, testing, version control with Git/GitHub, and collaborative software development workflows.
- Strengthened front-end development skills by creating responsive, user-friendly interfaces and integrating dynamic backend functionality with relational databases.
- *Enhanced professional competencies through intensive training in* presentation skills, effective communication, teamwork, problem-solving, critical thinking, adaptability, time management, LinkedIn optimization, ATS-friendly CV writing, interview preparation, and understanding business and product development fundamentals.
- Demonstrated the ability to quickly learn new technologies, collaborate effectively within cross-functional teams, and deliver high-quality technical solutions under project deadlines.

Java Developer Intern 09/2025 – 12/2025

ProgressSoft

- Developed and maintained Java-based enterprise application modules during a structured 4-month internship at ProgressSoft, a leading fintech company in Jordan
- Collaborated with senior developers on backend logic, API integration, and unit testing within an Agile team environment
- Completed ProgressSoft's internal Java Developer training program, covering enterprise Java patterns and software best practices

EDUCATION

Bachelor of Science in Computer Science. 86% 10/2022 – 02/2026

Zarqa University

PROJECTS

CaeFit
Orange Final Project
- CarFit is a smart car recommendation web application built specifically for the Jordanian market.
- Unlike traditional car listing websites, CarFit asks users a set of personal and lifestyle questions and uses their answers to match them with the most suitable car from the database. The platform places special emphasis on the Jordanian car inspection report (ورقة الفحص) for used cars, scoring each car's condition and presenting the results in plain Arabic and English. This ensures that any buyer, regardless of their technical knowledge, can make a confident and informed decision
- Live Demo :https://carfit-shahad-fea5abd3faayg8fa.westus3-01.azurewebsites.net/

My PortFolio
- This portfolio showcases the work, skills, and experience , a Full Stack Developer specializing in ASP.NET, with a background in architecting high-performance, scalable web applications from database to UI.
- Demo: https://shahadkhraisheh96.github.io/my-portfolio/

Gold Tracker
- The Gold Price Tracker allows users to monitor real-time gold prices through interactive charts, manage personal asset portfolios, and stay updated with the latest financial news — all with a clean UI and full dark mode support.
- Features:
- Live gold price chart (1-month history via API)
- Asset management with add/remove functionality
- Integrated financial news feed
- User authentication (Login & Register)
- Demo: https://shahadkhraisheh96.github.io/goldTrakerProject/

Voltex
E-Commerce Web Application
- **VOLTEX** is a full-featured, modern E-Commerce Web Application built using **ASP.NET** **Core MVC**.
- It provides a robust architecture with complete user and admin roles, secure authentication, dynamic product and category management, a persistent shopping cart, an advanced order system, and an interactive, highly responsive UI powered by modern web technologies.
- it is group project My Role was a Scrum Master

MarshiNinja
Game Development Competition
- Participated in a competitive game development challenge, designing and submitting a playable prototype within competition constraints
- MarShi Ninja is a 2D action-adventure game that follows the journey of a skilled ninja fighting to survive in a world full of enemies and danger. The player must defeat all opponents, collect scattered coins, and reach the end of each level safely to complete their mission.
- Game Link: https://play.unity.com/en/games/b0aaad6c-4b36-46de-b9db-596f1935fb92/marshi-ninja

Fake News Detection System
Graduation Project | NLP + Machine Learning
- Built an NLP-powered fake news detection system as a graduation project using machine learning classification algorithms
- Implemented linguistic pattern extraction pipeline to analyze news articles and flag misleading content with measurable accuracy
- Designed to support digital media platforms in real-time misinformation detection — tested against a dataset of 1,000+ news samples

HoneyByte E-Commerce Platform
3 Production Iterations
- v1 (2023): Built front-end product catalog using HTML, CSS, and JavaScript
- v2 (2023–24): Rebuilt with PHP, SQL, and MySQL backend — added product database, category filtering, login/signup system, and shopping cart
- v3 (2024–25): Re-architected using ASP.NET MVC and C#, implementing full MVC pattern with database-driven product management and user authentication

SKILLS

Technical Skills
Backend
Java (OOP), ASP.NET MVC, C#, PHP, Python , Javascript
Frontend
HTML, CSS, JavaScript, Android (XML + Java), Angular
Database
SQL, Oracle SQL, MySQL, PHP-SQL
Machine Learning / AI
Machine Learning, NLP, Classification Algorithms
Tools & Platforms
Git, GitHub, Linux, Matlab, Visual Studio, AWS

Soft Skills
problem-solving
Analytical thinking
Effective communication
Teamwork
Adaptability
Time management
Continuous Learning Mindset
Work Under Pressure
Presentation Skills
Fast Learner
Hard Worker

CERTIFICATIONS

Java Developer Training
- Issuer: ProgressSoft
- Status: completed alongside internship

CTF & Cyber Warriors Training
National Cyber Security Center (NCSCJO)

Full-Stack ASP.NET
Issuer: Pioneers Academy

Leaders Training Program
IEEE SAC Jordan

UI/UX Design
Issuer: Google Developer Group

VOLUNTEER

Vice Chair 03/2025 – 10/2025
IEEE Zarqa University Student Branch
•Led branch operations and strategic planning for a 100+ member IEEE student community at Zarqa University
•Coordinated technical events, workshops, and competitions, increasing branch participation by an estimated 30% quarter-over-quarter

Social Media Manager 04/2024 – 03/2025
IEEE Zarqa University Student Branch
•Managed all official social media channels for the branch, growing audience reach and event attendance through consistent content planning
•Produced promotional material and post-event content for 10+ technical activities including CTF competitions and training sessions

CTF Designer 07/2024
ZUCTF-v1 Competition
•Designed and built cybersecurity Capture The Flag (CTF) challenges for ZUCTF-v1 — Zarqa University's inaugural CTF competition
•Crafted problem sets spanning web exploitation, logic puzzles, and basic binary challenges for 50+ participating students
